EDUCATION

BACHELOR'S DEGREE IN
INFORMATION TECHNOLOGY
VNUHCM - University of Science
2021 - 2026

6.5 IELTS
IDP Education
2021 - 2023

TECHNICAL SKILLS

- Programming Languages:
 - JavaScript, TypeScript, Java, C#, Python.
 - Node-RED.
- Web Technologies:
 - HTML, CSS.
- Frameworks & Platforms:
 - BackEnd: Express.js, Spring Boot, .NET.
 - FrontEnd: React.js, Bootstrap.
 - Low-code Development: Microsoft Power Platform.
- Database Management:
 - MySQL, PostgreSQL (Supabase)
 - Firebase (Realtime Database, Firestore).
 - MongoDB.
- Development Tools & Version Control:
 - Git, Jira, Slack, Postman.

About Me

As a recent graduate from the University of Science, I am passionate about computer science with a strong focus on backend development. I am currently seeking a full-time backend developer position where I can design and build reliable, scalable systems. At the same time, I am eager to grow into a fullstack developer by broadening my skills across both backend and frontend, contributing to impactful and innovative projects in a dynamic team.

WORK EXPERIENCES

C.P VietNam Corporation
June 2024 - August 2024

Role: IT Intern

- Contributed to the development of the company's promotional website using Javascript, HTML, CSS and React.js.
- Assisted in troubleshooting and resolving hardware and software issues for over 150 employees using TeamViewer, Microsoft Teams.
- Helped set up and manage network devices including routers and switches, ensuring secure and efficient network operations.

FPT SoftWare
November 2024 - February 2025

Role: ERP Technical Consultant OJT

- Proficient in Power Platform through building a complete enterprise website.
- Modified and extended functionalities using JavaScript for the interface and IPlugin C# with .NET for backend operations.
- Contributed to two major projects at FPT: IDEC and SEPTINI.
- Learned and applied professional Git workflows.

PROJECTS

Team size: 2 members

Pet Tracking Collar

- **Technologies Used:** ESP32, Arduino C/C++, MQTT (PubSubClient), Wi-Fi, DHT22, Node-RED, HiveMQ, Wokwi.
- Built an **IoT pet-tracking collar** prototype that publishes real-time temperature and GPS data from ESP32 to MQTT for live monitoring.
- Added remote buzzer/LED control from a dashboard via MQTT, enabling quick find-pet alerts when pets move out of sight.
- Preference: <https://github.com/HuyLemm/PetTrackingCollar>

- Other Skills:
 - API Development & Integration.
 - Cloud Services (Firebase, Azure Power Platform).
 - Workflow Automation with Node-RED.
 - ML/AI: Hugging Face, PyTorch, NLP, RAG, Model Fine-tuning.

SOFT SKILLS

- Effective Planning and Organization
- Passionate about Exploration and Learning
- Gaming Aptitude
- Strong Teamwork Skills
- Proficient in Graphic Design

Team size: 2 members

Role: NLP / Machine Learning Engineer, Frontend Developer

Cross-Lingual Text Similarity & Retrieval System

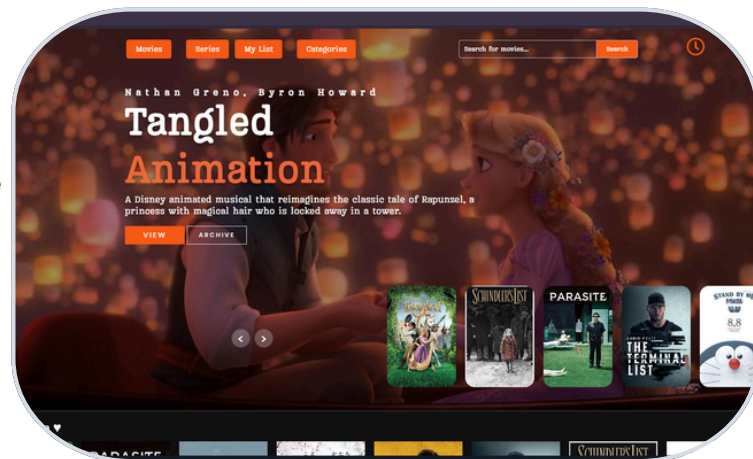

- **Technologies Used:** React, TypeScript, Express.js, Python (Flask), FAISS, sentence-transformers, PyTorch.
- Developed an EN/VI **semantic retrieval system** that returns top-k documents/chunks by embedding similarity from user queries.
- Benchmarked MiniLM and BGE pipelines with FAISS ANN indexing for efficient retrieval.
- Built incremental PDF corpus updates (ingest/remove + auto re-index) to keep results current.
- Delivered an evaluation dashboard for retrieval quality and latency analysis.
- Preference: <https://github.com/HuyLemm/Cross-Lingual-Semantic-Search>

Team size: 3 member

Role: Backend Developer + Team Leader

Watching Movie Online Web (Fanta)

- **Technologies Used:** React, Express.js, MongoDB, JWT, Google OAuth, Nodemailer, Next.js, TypeScript, AI Chatbot (RAG).
- Built a full-stack movie streaming app with Home/Category/Detail/Watch/Search flows.
- Added discovery features: keyword search, genre filtering, top-rated/top-10, and similar recommendations.
- Implemented auth, profile, watchlist/favorites, watch history, ratings/reviews, and admin CMS (RBAC + CRUD).
- Integrated a **RAG-based AI chatbot** for natural-language movie Q&A and personalized recommendations.
- Preference: <https://github.com/HuyLemm/Fanta>
- Website: <https://fanta-cutie.vercel.app>

Team size: 1 member

Role: FullStack Developer

Online Bidding Auction Web (LuxeAuction)

- **Technologies Used:** React, Express.js, TypeScript, PostgreSQL (Supabase), Knex, JWT, node-cron.
- Built an **auto-bid engine**: users set max bid, system auto-raises by bid step within ceiling limits, so rebidding is no longer manual.
- Implemented bid conflict handling (priority/tie rules, instant outbid updates) for consistent auction outcomes.
- Delivered core auction flows: listing, bidding, watchlist, buy-now, search/filter across Guest/Bidder/Seller/Admin roles.
- Built secure auth + OTP and admin modules (user/category/product moderation, seller approvals, event email notifications).
- Preference: <https://github.com/HuyLemm/OnlineAuction>
- Website: <https://online-auction-tw92.vercel.app>
